

Test 1

Student's name: Andrea Sofía Ribadeneira Vacacela

The reading passage mentions about the advantages of renewable energy while in the listening is being mentioned the contrary of the reading since in here it is stated that the renewable energy sources are not as trustworthy or cost applicable as advised. This essay will talk about the advantages of renewable energy mentioned in the reading and the divergent presented in the listening in three aspects: Sustainability, economic benefits, and technology advancements.

First, sustainability in the reading highlights that renewable energy is inherently sustainable because the sources are coming from the nature such as: the sun and the wind. They two are abundant to support this energy to be renewable. However, in the lecture sustainability about energy it is just a theory because of stuck intermittent accessibility.

Second, the economic benefit in the reading talks that renewable energy can be more affordable. Although, the lecturer underlines the high costs associated renewable energy infrastructure for example: solar panels and wind turbines.

Finally, technological improvements in the lecture it is acknowledged that renewable energy technology is still development. On the other hand, in the reading says that technology helps to reduce the costs that allows clean energy competitively.

In conclusion, while the reading passage advocates the good renewable energy facts, in the lecture renewable energy is high cost due to intermittency, technological limitations that ends in economic factors. It is clear what it comes next that it is to take better care of the air, water, and sun to push to integrating more renewable energy sources in the planet.
