

Bubbles template

In the given template, I would like you to make five questions related to the reading topic, "**Digital habits across generations**" by British Council. You don't need to pre-read the text; instead, use your questioning skills to infer the probable content of the reading. After briefly skimming and scanning the text, answer your own generated questions generated previously within the designated bubbles, following a logical sense. If you can't find answers to your generated questions, please indicate so within the bubbles as "*no given information*" or "*not found information.*" Finally, construct your summary using the key points from the read text, (Check your sticky notes).
